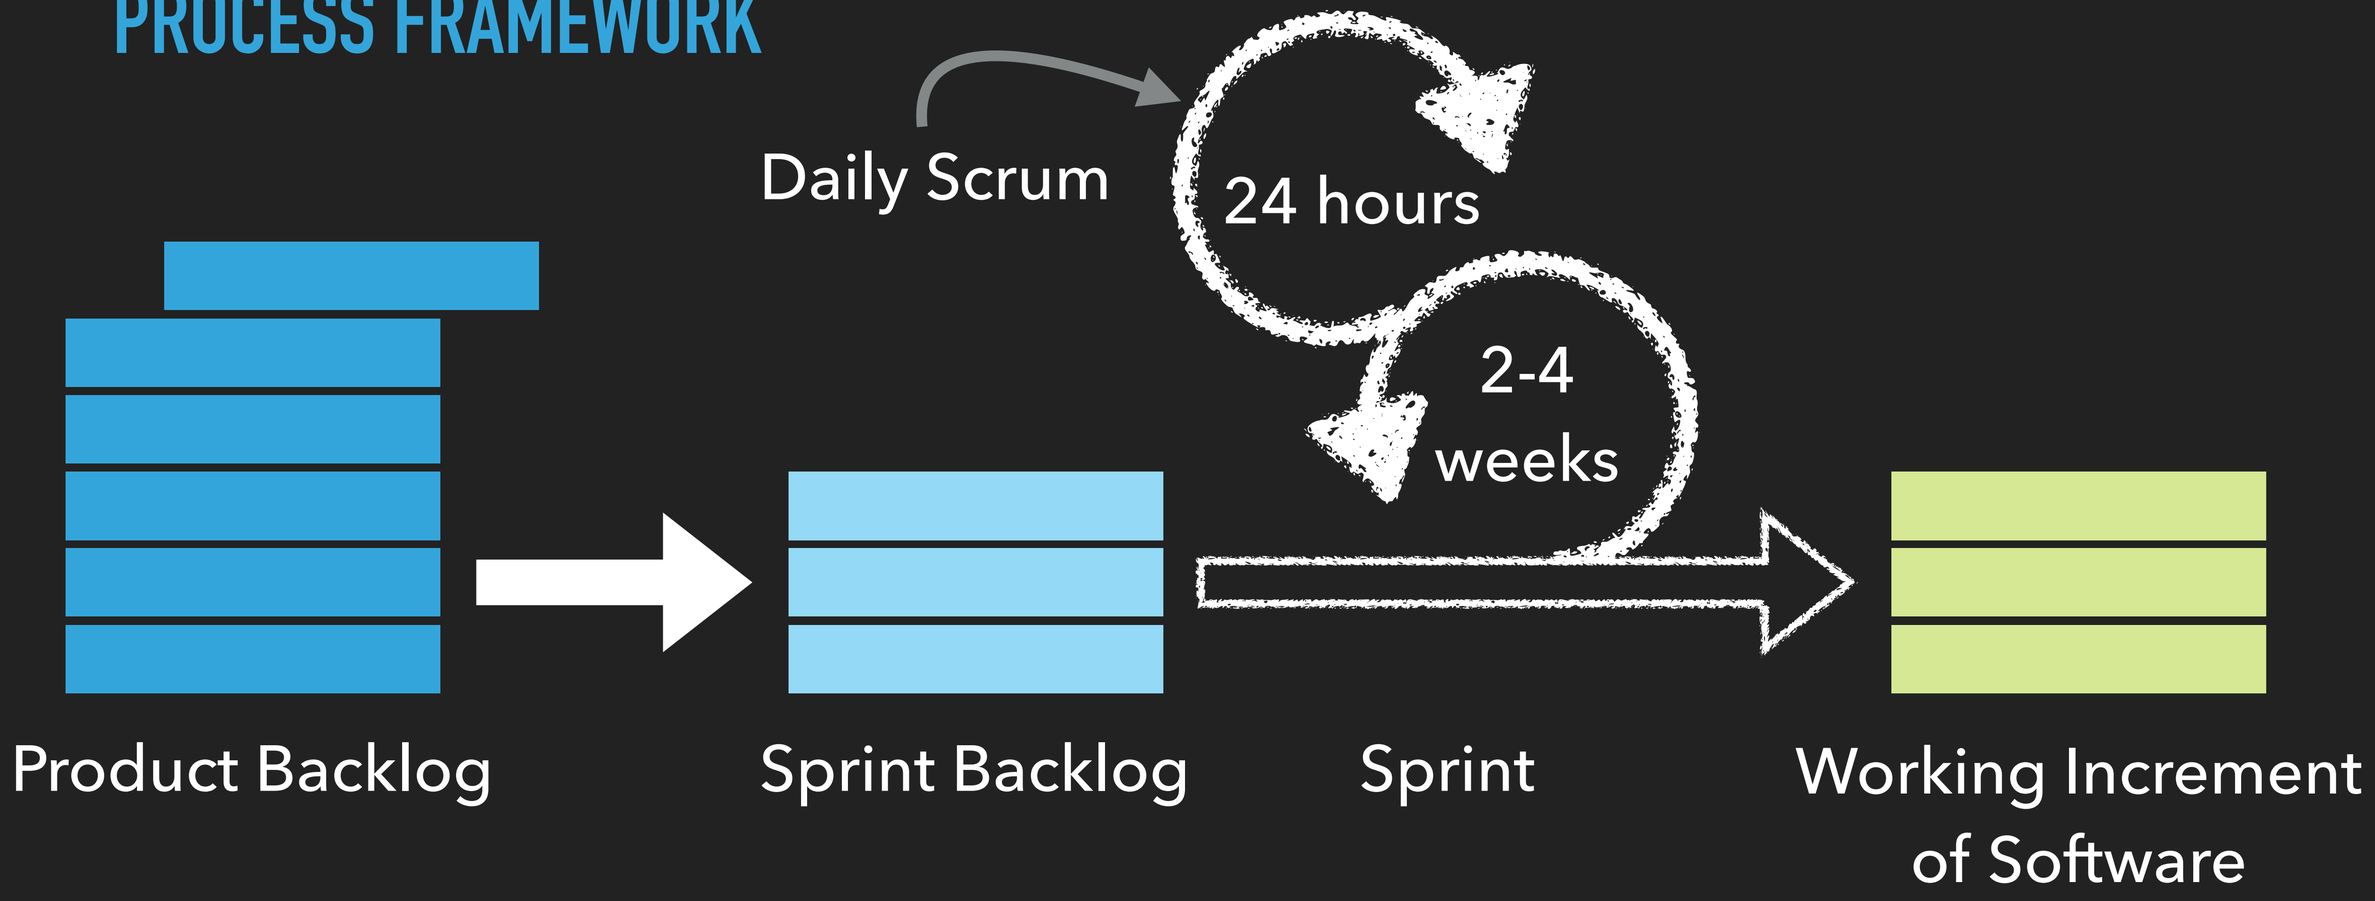
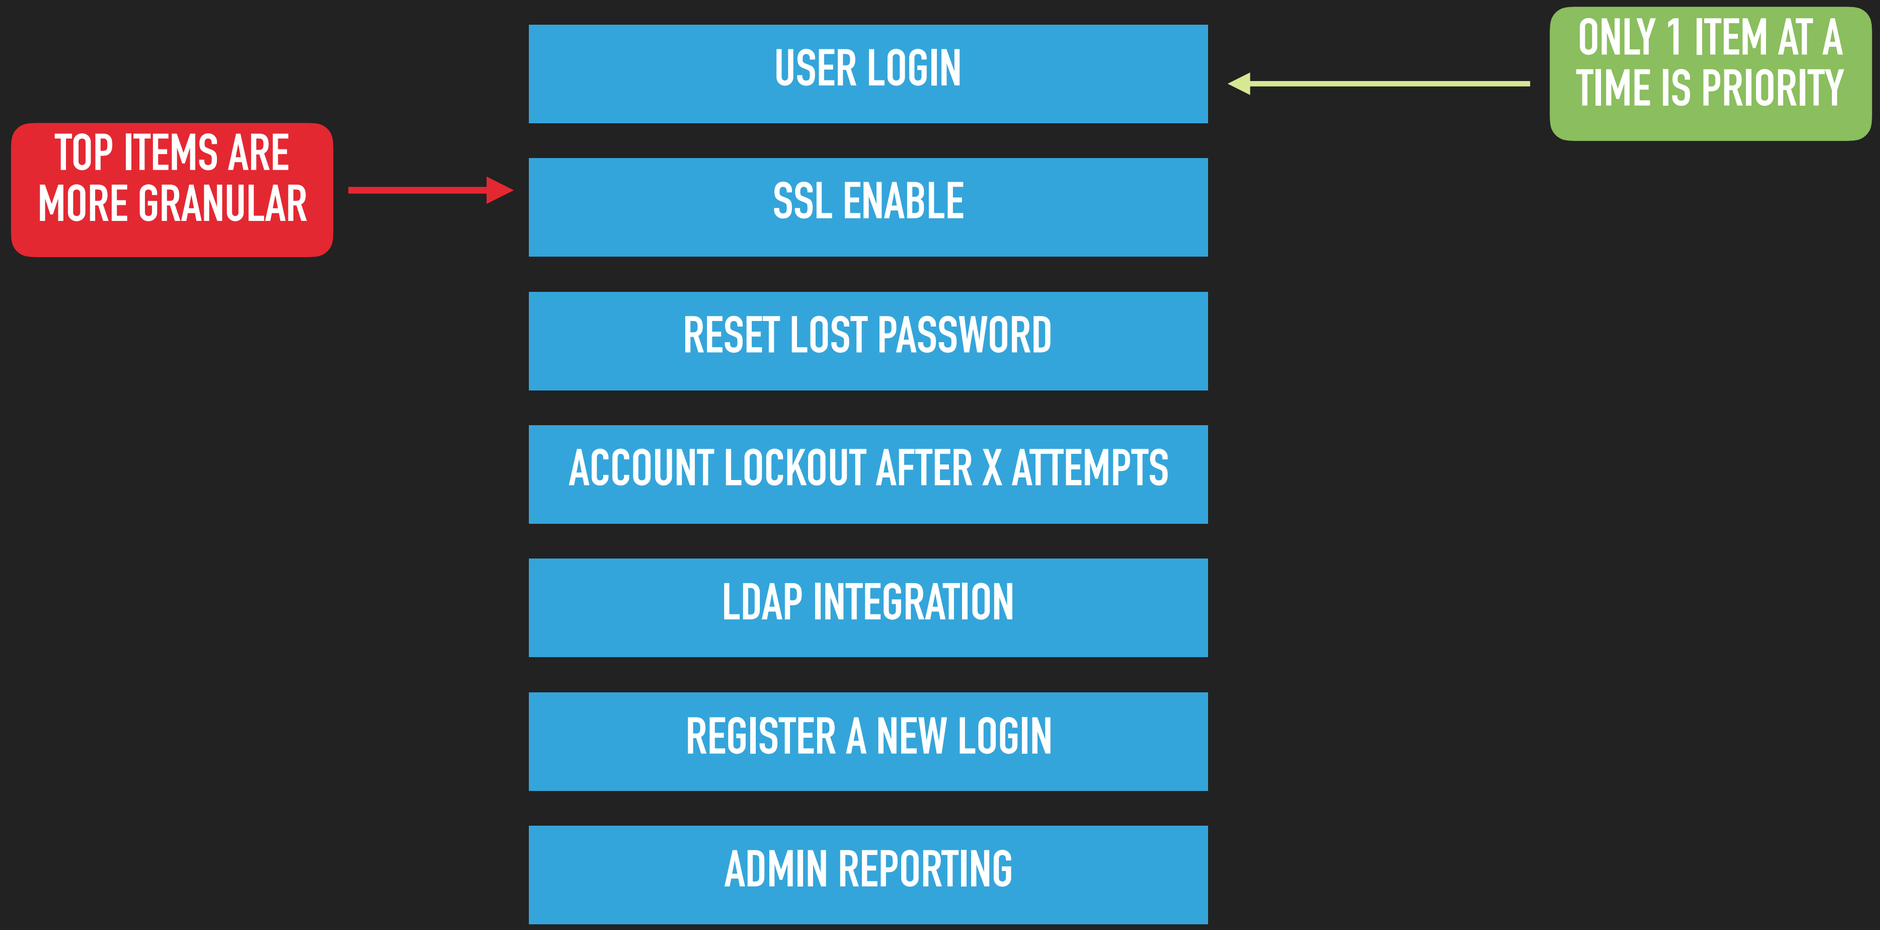
ABOUT

PRODUCT BACKLOG

PROCESS FRAMEWORK



PRODUCT BACKLOG



PRODUCT BACKLOG

- The requirements for the system or product
- Product Owner is responsible for the contents, prioritization, and availability of the Product Backlog
- It is never complete
- Is merely an initial estimate of the requirements
- Span to foreseeable future
- Visible to all stakeholders
- Force-ranked (prioritized) list of desired functionality
- Any stakeholder (including the Team) can add items

PRODUCT BACKLOG

- Constantly re-prioritized by the Product Owner
- Constantly refined by the Scrum Team
- Items at top should be smaller (e.g. smaller than 1/4 of a Sprint) than items at bottom
- Made of pieces of functionality or wish list
  - Epics
  - Stories
- Proven business value
- Testable
